

2018-2019 Severe Weather Bus Information

Severe Weather Bus Information

Ice or snow could require the changing of the routes above the boulevard. This decision will be made by 6:00 AM. by the Superintendent and Transportation Coordinator. Local media will be notified and begin making the announcement. The information will be posted on the district web site. You can also contact the Transportation Dept. at 541-482-3174. For the safety of our students riding district school buses, the school buses will not be making stops on streets above N. Main or Siskiyou Blvd. during snowy or icy conditions. These stops and times will be in effect when there is snow over most of the city and on the roads in town above the boulevard. It will affect all stops above the boulevard.
